

HOW TO USE THIS CATALOGUE

The BJBC demonstration and research projects used and produced a number of tools to reach their goals and findings. These include trainings, resource guides, assessment tools, surveys and reports. This catalogue lists the major tools from the 13 BJBC projects.

Each tool is outlined in a one-page profile that provides:

- ◆ A short description
- ◆ Information on how to use the tool
- ◆ The grantee(s) that used/developed it
- ◆ Details on where to obtain the tool and/or get more information

These tool profiles are in the main section of the catalogue, *Tools and Resources*, and are organized into the following categories:

- ◆ Training (includes curricula)
- ◆ Resource Guides (includes manuals, toolkits, videos)
- ◆ Assessment Tools
- ◆ Surveys
- ◆ Reports (includes issue briefs, white papers, fact sheets)
- ◆ Policy (includes legislative testimony)

These profiles are cross-referenced by grantee in the *Index of Tools by Grantee* section.

The *Appendix* provides an overview of the publications and resources produced by the BJBC national program office. You can also visit the BJBC Web site at www.bjbc.org for online versions of the resources, along with additional information about the program.
